

# GIVING ALL THE DOSES

## 11-12 Years of Age

- Needle Lengths
  - IM= 1 to 1.5 in
  - SC= 5/8 in
- Separate injection sites by 1-2 inches
- Professional judgment is appropriate when selecting needle length for use in all children, especially small infants or larger children.
- Assess for other recommended vaccines that may be needed-
  - MMR      Polio
  - hep B    Hep A
  - influenza
- Syncope or fainting after vaccination may occur in adolescents & young adults, usually within 15 minutes of vaccination
- When giving vaccines to teens:
  - Have the patient sit down while you are giving vaccine(s)
  - Consider observing patients for 15-20 minutes after vaccination

### NOTE:

Var should be administered to school age children and adolescents without:

- history of 2 doses of varicella vaccine
- a healthcare provider's diagnosis of varicella disease or verification of history of typical varicella disease
- history of shingles

HPV4 is licensed for use in **girls only** 9-26 years of age
