**FLU AND YOU**
— KNOW YOUR RISKS —

**GET VACCINATED TODAY!**

**GETTING SICK SUCKS**
Most people who get the flu are sick for over a week. That’s more than 7 days without class, social functions, and even work. You simply can’t afford to get sick.

**YOU CAN AFFORD TO GET VACCINATED**
Most insurance plans cover the cost of flu vaccine. You can get vaccinated at your primary care provider, local pharmacy, student health center, or local health department. For those who are not covered, it is worth the cost.

**FLU IS EASILY SPREAD**
Close contact such as dorms, classrooms, public transportation, parties, and sports events make flu easy to spread at college.

**FLU IS SERIOUS**
Even healthy people get the flu and it can be very serious. Flu is not the common cold. Every year, healthy young adults become severely sick and some even die from the flu.

**VACCINE: THE BEST PREVENTION**
The single best way to prevent the flu is to get vaccinated every year. While other preventative measures (such as hand washing) are important, the flu vaccine is your best bet.

**IT CAN HAPPEN TO YOU**
Lack of sleep, not eating healthy, and not exercising regularly weakens your immune system, making you vulnerable to flu. Your lifestyle puts you at a unique risk.

**Contact Your University Health Center or Healthcare Provider Today!**

**KNOW YOUR RISK • KNOW THE FACTS • GET VACCINATED**

There are other vaccines you may need to stay healthy, including HPV, Meningococcal, and Tdap. For more information talk to your healthcare provider.
